Objective

Motivated and results-oriented Data Engineer with experience in data architecture, development on Google Cloud, as well as Golang and Python. I'm looking to apply my skills in an innovative organization to contribute to effective and scalable technical solutions.

Work Experience

2023 – 2024: **Freelance Data Engineer** at **Famoco**, Remote

- Rework of the python solution for data collection in Golang to improve performance and costs.
- Creation of dashboards to visualize collected data and drive improvements in the process.
- Using Terraform to deploy solutions easily with controlled privileges,

2022 – 2023: **Data Engineer Apprentice** at **Famoco**, Paris 4

- Implemented a data collection solution using Google Cloud Platform.
- Created a health indicator for device batteries.

2021 – 2022: **Chief Data Officer Apprentice** at the **French Navy**, Paris 15

- Oversaw data mapping projects.,
- Established a data policy.
- Conducted database reconciliation to create an operational data reference.

Education

2018-2023: Engineering degree, majoring in Big Data and AI at EFREI Paris

2018: Scientific Baccalaureate at Institution Sainte Marie d'Antony, graduated with honors (Mention Bien)

Certifications

DP-100, Microsoft Azure : Azure Data Scientist Associate

TOEIC : 880

Certificat Voltaire

Google Cloud : [Google Cloud Certifications](#)

Machine Learning Course, Stanford University

Sustainable Development: Challenges and Pathways, Laval university

Hard Skills

Data Science/Engineering	Google Cloud Plateform	Python
Golang	Nuxt JS / TailwindCSS	Linux

Soft Skills

Communication	Sense of Responsibility	Curiosity

Hobbies

Surfing	Running	Basketball	Video Games
